Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The close reference for the current invention is Newman et al (J. of organic chem.. vol. 31, no. 12, p. 3980-3884, 1966).

Newman et al teaches a general method for converting a phenol to the corresponding hydrocarbon in the following rearrangements:

The pyrolysis of O-aryl dialkylthiocarbamates (III) affords S-aryl dialkylthiocarbamates (IV), which can be readily hydrolysed to the corresponding aryl mercaptans. The aryl mercaptans further can be treated in the presence of Raney nickel catalyst to produce the hydrocarbons, such as benzene.

The instant invention, however, differs from the prior art in that the claimed starting material has an extra carbon bond between a carboxyl group and a substituted phenyl group although the prior art reaction process is similar to the claimed invention. In addition, unless all limitations of the claims are met, there is no prior art rejection. See In re Zurko 59 USPQ 2d 1690 (Fed Cir. 1991) and In re Lee, 61 USPQ 1430 (Fed Cir. 1991).

Therefore, applicants' claimed subject matter would not have been obvious to the person with an ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning the communication after allowance such as sending all post-allowance correspondence should be directed to "Box Issue Fee" or faxed directly to PUBS at 703-305-8755. This will expedite the process of these papers.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
